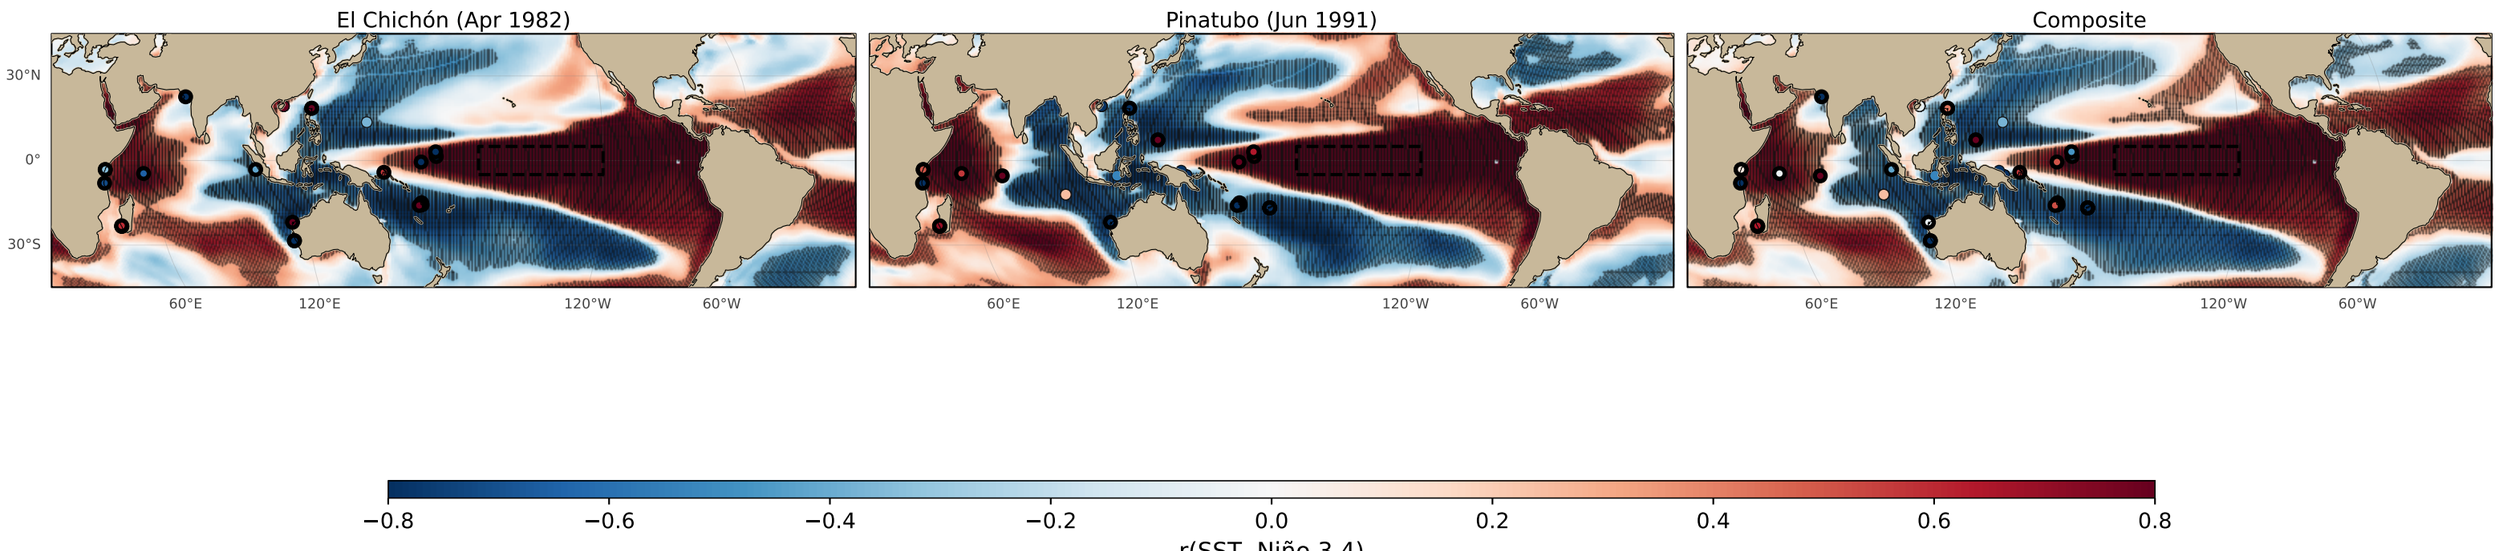
Post-Eruption ENSO Variance Fraction: r(SST, DJF Niño 3.4) | iCESM LME · 4 members · Y0–Y7 · r² = ENSO fraction of DJF variance



DJF Niño 3.4 (Trenberth 1997 / Adams et al. 2003) · Y0–Y7 · 32 obs/eruption (4 members × 8 DJF years) · Composite n = 64 · OLS R^2; F-test stippling $p < 0.05$ · Circles: observed iso2k $\Delta\delta^{18}O$ (mean Y0–Y7) · bold = $p < 0.05$, thin = $p < 0.10$
